

Dynamic Team Concepts Series

CORE I

This course is an introduction to the CORE Series for team members. Team members will be introduced to neuromuscular science in dentistry, occlusion and aesthetics, management of the dental practice, communication with patients, teamwork in the dental office, T.E.N.S.ing, aesthetics and the health of the patient, and hands-on myotrodes placement.

The objectives of this course are for the participant to be able to:

- Understand the importance of recognizing malocclusion issues and the need for neuromuscular care for a patient
- Understand better methods for managing the difficult or needy patient
- Recognize and document health issues in the dental patient
- Understand the use of T.E.N.S.
- Recognize the value of a solid team that communicates well and works toward a specific goal in the aesthetic dental practice
- Return with a practical and solid set of tools to integrate the concepts the doctor learns in the CORE I program
- Integrate effective and powerful team meetings
- Help educate patients about their dental and occlusal issues
- Recognize and discuss esthetic issues with patients
- Embrace the growth and change that is happening in the practice
