NuCalm™ Informed Consent Form

This information is provided to help you understand NuCalm™. Before we begin, let us be certain that you have enough information, so that you're well informed and confident that you wish to proceed. This form will provide some of the information. We can discuss any questions.

NuCalm is a four part system designed to induce relaxation and minimize anxiety. This anxiety management system is not intended to diagnose, treat, cure, or prevent any disease.

The NuCalm proprietary orthomolecular formula (all-natural dietary supplements) has been developed over several years to maximize the body's natural relaxation response with NuCalm. The proprietary formula is only available in the NuCalm system and includes structured nutrient-sourced building blocks that rapidly enter the body and convert to powerful chemical messengers that suppress anxiety and create relaxation. All components are essential ingredients and supplement the body's natural chemistry to interrupt an anxious response. The FDA has not evaluated this statement.

The Cranial Electrotherapy Stimulation (CES) is a Class IIIa Medical Device designed for the reduction of anxiety, depression and/or insomnia when administered by a licensed healthcare provider. The CES is an FDA-cleared device and is available in the NuCalm system by prescription only.

Light blocking eye mask or tinted glasses are used to block light to the optic nerve resulting in an immediate increase (up to 30%) in alpha waves in the visual cortex of the brain.

Proprietary neuroacoustic software is designed to entrain the brain wave function and lead the brain to a pre-sleep alpha state (4 Hz-12 Hz). The FDA has not evaluated this statement.

PLEASE BE SURE TO ASK ANY QUESTIONS YOU WISH. It's better to ask them now, than wonder about it after we start NuCalm.

Risks Of The Recommended Treatment: No dental treatment is completely risk free. I will take reasonable steps to limit any complications NuCalm. However, there are some contraindications that tend to occur with some regularity. Precautions include:

- No electrical medical device from chest up* - Use the system without CES
- No person under 12* - Do not use Nutritional Supplement
- No pregnant nursing females* - Do not use Nutritional Supplement

If you have any questions about these complications, or about any other complications you have heard or thought about, please ask. I believe that the treatment will be most successful when you understand as much as possible about it, because you will be able to provide more information to me and to ask better questions. No question is too simple to ask and I have as much time to answer them, as you need. When you feel you can make an educated decision about this recommendation, then we can get started with NuCalm.
