Introduction

Congratulations! You are in for a treat!

Orthodontics is not a weekend course. The more you get into it the more you will realize you need to hear this more than once. Everything is hard before it is easy so don't get frustrated. Get educated. Listen, understand, do, and repeat.

My goal is to bring clarity to those who have attended the critical foundation knowledge so eloquently delivered by David and Tim. It will be enlightening and affirming.

I am currently busy preparing my presentations. A critical aspect of this and my most burning desire and ambition are to ensure that the questions that conceptually or in practicality are plaguing you get answered! To that end I would like you to email me PRIVATELY with your specific challenges. I will ensure that within the program, they get answered.

The following may sound a little tough however it is extremely important for continuity of thought and concept, for the WHOLE class, that I am not interrupted with your questions while I am lecturing. They will often be off tangent to the message I am trying to get across or will be answered as a natural consequence of the ensuing information. Understanding both the concepts and the practicality are essential for success and that requires continuity. We need to be fair to everyone in the class.

Jaw Development Orthodontics is exciting and ground breaking but you have to pay attention to the details or your results will not be as good as they could have been. I am very excited to help you all.

There will be too little time to collate the questions once the program begins so please get cracking on sending your questions through or forever hold your peace!! 😊

Remember to email me privately - not the forum. I will acknowledge receipt of the email to confirm I have it but the questions will be answered within the program. Best email address is this one: ae@physiologicapproach.com.au

Thank you and see you soon!
