# CBCT

## Head and Neck Anatomy and Evaluation

*"It is not only the best CBCT program but the best anatomy program I have ever done. And I have done some great programs. Why? Because everything is relevant, hands-on and identifiable on the CBCT. Bill has an explain, show, do approach. It is balanced, fun, informative and perfect learn today, use tomorrow info. So essential for treating TMD."*

- Dr. Anne-Maree Cole

### COURSE DESCRIPTION

Everyone treating TMD patients should be having CBCT's taken. This course is NOT just for those with a CBCT in their office. This course is designed to teach everyone to read and interpret CBCT's whether they are done in the office or by a radiology center. It is considered by most to be the best head and neck anatomy course as well as you have to know the anatomy to know what normal is for diagnostic purposes. You will be presented with information to align the images, analyze the results and determine pathology. You will be shown normal anatomy so you can recognize abnormalities. Discover how to determine proper neck curvature, joint decompression and TMD related indicators. In this hands-on course you will work through a patient with a checklist to use on every scan you get or take in your office.

### COURSE OBJECTIVES

- Interpret Cone Beams
- Recognize normal architecture
- Recognize anomalies and where and when to refer
